Detailed Report:

The Session started by a welcome note from senior professors of Jadavpur University and the President of JU IIC - Dr. Rajib Bandopadhyay. Mr. Archan Deb then took the stage to discuss the role of Green Bengal Innovation Network (GBIN) and SwitchOn Foundation's role in Bengal's Startup ecosystem, especially in the field of GreenTech. Attendees were made aware of how to approach novel ideas in the industry and seek angel investment/venture capital to execute large-scale projects. Thematically common problems in different parts of the industry were picked up and discussed such as energy efficiency, circular economy, soil remediation, recycling, waste management, etc. A video and ppt were shared by the speaker to make the session more interactive.

Attendees were also invited to the GBIN Symposium and Green Bengal Enterprise Challenge scheduled in 2023.

This was followed by Mr. Bikram Mitra, founder of Earth Craft sharing his story of entry to the Green Tech industry. He discussed how it's a perfect fit for budding entrepreneurs that don't just want to create a business but also a positive social impact. Finally the session closed off with a Q&A and vote of thanks.
